Within the NHS, doctors are a valued and expensive resource, yet are perceived as at risk of burnout. This short article seeks to identify ways in which doctors can engage with medicine and improve their resilience. We suggest that this is best achieved through quality work, continuing professional development and social contact with other colleagues. The authors use their own experiences as examples. There are no absolute solutions, but it is important that doctors recognise that burnout is a multifaceted issue, which can be addressed at a number of levels.You know the story: A little girl and her father were flying on vacation in Europe when her father let her pick out a present to bring back for her mother. "I want an alligator," said the little girl. "I know your mother would love it," said her father. Once upon a time, before store-bought, store-bought corn dogs, there was a hot dog stand on Pennsylvania Avenue in Washington, D.C., called "The Willard." It was a big part of the city's social life, a hot dog stand that was a hot dog stand – no frills, no fuss – where you could get a hot dog, a Coke and a bun for 35 cents. It also became a hot dog stand where you could meet a lot of famous people. You could meet John F. Kennedy and Richard Nixon. You could meet your favorite band and your favorite politician and your favorite movie star.Q: Comparing two lists and return matches based on a value I have a list called List categories = new List
